

OBILITE

Obilite, a reduced scale version of Obi, is a slender, useful and easily placed pedestal table in heights of 500 or 570 mm. The Obi signature joint in diecast aluminium ties together the three chromium-plated solid steel legs. The table top is of tempered glass with white or black screenprint, or of compact grade laminate with white surface. The name 'Obi' is Japanese and refers to the long sash that ties around and holds together the Japanese kimono.
